

**EYFS Learning wall**  
**Mathematics: Shape, space and measure**

	I can place events that I am familiar with in time order.			I am comfortable using everyday objects and shapes to build models and create patterns	
		I know simple ways to count time over a short period.		I am able to talk about measurements to compare things and find the answer to questions and use special words to describe objects and their patterns..	
		I can use everyday words to talk about things involved in time.		I know some words that I can use to talk about money.	

***Early Learning Goal (expected stage of development at the end of Foundation year) : Children use everyday language to talk about size, weight, capacity, position, distance, time and money to compare quantities and objects and to solve problems. They recognise, create and describe patterns. They explore characteristics of everyday objects and shapes and use mathematical language to describe them.***
